Subject: RE: Internships

Is she looking for an internship where students would learn what we do in the public health labs, or space where they could carryout her research? It's a little difficult to tell from what I read below.

Julie,

Dr. Christine Rodgers of the University Of Massachusetts School Of Public Health wanted to know if internships were available for students to work in Public Health Laboratories. She is applying for funding for these people through grants. I explained the nature of our laboratories work, providing analysis for law enforcement and how it would make it difficult to accommodate any students. But she thought the department might have other possibilities. Is there someone she should contact? This is her profile from UMass web site. Have a great Thanksgiving. Jim
